You can create graphs with graphviz. Enabling `shell_escape` option in `config.json` is required if you want latex to automatically generate the graph.

The file `abc.pdf` hasn't been created from `abc.dot` yet.

Run `'dot -Tpdf -o abc.pdf abc.dot'` to create it.

Or invoke  $\text{\LaTeX}$  with the `-shell-escape` option to have this done automatically.
