1 Introduction

This example shows how references works.

2 Sections

You can add a reference to section 1.

3 Equations

You can refer to equation 1.

$$\phi = \frac{2\pi f D}{c} \tag{1}$$

4 Tables

Reference to 1. Caption is required for the reference to work properly.

 $\begin{array}{c|cc} \text{Table 1: a nice table} \\ \underline{ \begin{array}{ccc} \text{Anchor} & \text{MAE} \\ \hline \text{a1} & 6.871 \\ \text{a2} & 5.275 \\ \text{a3} & 5.406 \\ \end{array}}$

5 Code

```
You can refer to code ??
int main()
{
    printf("hello world\n");
}
```
